

PRIYAM SEKRA

Applied AI Engineer · Voice & Agentic Systems · Client Deployments

Jaipur, India | +91 78510 43033 | priyamsekra@gmail.com | priyam.onrender.com
linkedin.com/in/priyam-sekra | github.com/priyamsekra10 | medium.com/@priyam22rr

SUMMARY

Applied AI engineer and product lead who works directly with clients and business teams to scope ambiguous problems, build inside their stack and take AI systems from prototype to production. Currently AI Product Lead for **Juno AI** at Trugen AI, an AI personal assistant built on ElevenLabs, LiveKit, Deepgram, Telnyx and AWS, owning its realtime voice agents, outbound AI calling and third-party integrations, and growing it to **500+ active users** in its first month. Previously delivered production voice agents and LLM tools for NovusVista and Mentat Digital Solutions, and automated helpdesk workflows at DHL.

Comfortable owning a deployment end to end: integrating with existing systems over APIs, OAuth and event-driven AWS pipelines, monitoring agents in production, and explaining trade-offs in latency, cost and reliability to engineers and business stakeholders alike. Author of four AI publications, including a **Best Research Paper Award** at ICDTV; **4th of 20,000+ teams** at Bajaj Finserv's HackRx RAG hackathon; host of hands-on chatbot and AR workshops.

EDUCATION

Master of Business Administration in Technology (MBA Tech) Mukesh Patel School of Technology Management & Engineering (NMIMS) 89% · Thesis: <i>A Review on Smart Technologies Applications in Logistics and Transport</i>	05/2021 – 2026 Mumbai, India
Bachelor of Technology, Computer Engineering Mukesh Patel School of Technology Management & Engineering (NMIMS) 89% · Thesis: <i>VIZARO: A Unified AI-AR Framework for Immersive and Personalized E-Commerce Experiences</i>	05/2021 – 2026 Mumbai, India

WORK EXPERIENCE

AI Product Lead — Juno AI Trugen AI - Own product and solution architecture for a video-first personal assistant (chat, realtime voice, talking avatar) for users in the US and Canada, integrating ElevenLabs, LiveKit, Deepgram, Telnyx, Mem0 and AWS. Outbound AI calling agent: built a service that books appointments on the user's behalf (clarify → research → call to book → confirm) on a realtime speech-to-speech model, with a parallel shadow LLM that monitors each live call against its goal and corrects course mid-call. Scalable agent execution: architected a multi-tenant agent service (Hermes) on AWS with Lambda dispatch, SQS routing, DynamoDB task state and watchdog recovery, so one deployment serves many concurrent users reliably. Integrations: connected Gmail and Google Calendar over OAuth for proactive briefings and meeting prep with timezone-aware scheduling on EventBridge. Vendor evaluation & documentation: benchmarked realtime voice stacks on cost and time-to-first-token, compared memory layers (Mem0, Zep, Honcho), and wrote the architecture docs and engineering handoff specs used by internal teams and external development partners. Go-to-market: led Juno's marketing, from pain-point-led short-form content to paid-ads launch videos that show the user's problem before the product's value, growing to 500+ active users within a month.	01/2026 – Present Remote
---	-----------------------------

Summer Intern — Process Automation

05/2025 – 09/2025

DHL Express India

Mumbai, India

- Worked alongside the Helpdesk India team to automate their manual processes, building low-code solutions for process automation, risk documentation and real-time analytics with Power Apps, Power Automate and Power BI; the workflows saved **3–4 hours per day**.

Consultant AI Engineer, Researcher — Generative AI

02/2025 – 12/2025

Mentat Digital Solutions

USA · Remote

- Worked with the client team to turn emotional-mediation and healthcare workflows into AI tools, building LLM-based sentiment analysis and structured data capture with journaling and workflow automation.

Related blog: [Sentiment analysis and automation using LLMs](#)

Consultant Conversational AI Agent Engineer — Voice AI

03/2025 – 12/2025

NovusVista Pvt. Ltd.

Jaipur, India

- Took the client’s voice AI assistant from requirements to production, with ultra-fast RAG integration that significantly improved knowledge-base scalability.

Related blog: [Streamlining Voice Agent Development Using Pipecat Flow Automation](#)

Generative AI Engineer Intern — AI / Deep Learning

05/2024 – 05/2025

QuibbleAI Pvt. Ltd.

Jaipur, India

- Led development and deployment of AWS cloud-native conversational and WhatsApp AI agents in Python with Pipecat workflows, owning analytics, automated deployments, production monitoring and project management.
- Built a low-latency conversational voice bot for large documents and restaurant menus with CTO Jitin Doriya.

Related blog: [AI apps built on intelligent web scraping using Jina AI, Vector Databases and RAG](#)

Co-Founder, Deep Learning Engineer — Road Safety / Driver Analysis

02/2024 – 05/2024

AIProStack Solutions

Jaipur, India

- **AI integration for driver analysis:** developed models that monitor driver behaviour, including tailgating, distraction, seatbelt usage and phone detection.
- **Edge deployment:** deployed on Raspberry Pi hardware, streaming live video through Kafka for instant processing and alerts.

Machine Learning Engineer — Automated Employee Cybersecurity Training

04/2023 – 07/2023

AAIS.AI

France · Remote

- Developed an AI-powered employee cybersecurity training platform, now actively deployed by AAIS.AI for enterprise clients.

SKILLS

Programming	Python, SQL, Shell
Voice AI & Telephony	ElevenLabs, LiveKit, Pipecat, Daily WebRTC, Deepgram, Telnyx, speech-to-speech models
LLMs & Agents	Agno, LangGraph, LangChain, MCP, Mem0, RAG, reasoning LLMs, fine-tuning, RunPod
Integration & Deployment	REST APIs, WebSockets, OAuth 2.0, AWS (Lambda, SQS, EventBridge, DynamoDB, S3, EC2, ECS), Docker, Git, CI/CD, production monitoring
Data Science & ML	PyTorch, TensorFlow, Keras, scikit-learn, OpenCV, Pandas, Power BI, Streamlit
Product & Delivery	Requirements scoping, solution design, rapid prototyping, beta programs & user feedback, stakeholder communication, go-to-market
Documentation	Technical blogs, Mermaid and draw.io diagrams, LaTeX, Office, Canva
Languages	English, Hindi

LIST OF PUBLICATIONS

- **Priyam Sekra** and Vipul Bhatia. *Empathetic Intelligence: LLM-based Conversational AI Agent*. International Journal of Intelligent Systems and Applications in Engineering (IJISAE), Scopus-indexed.
- **Priyam Sekra** and Vipul Bhatia. *Enhancing Road Safety through AI-Enabled Driver Analysis*. International Conference on Digital Technology Vision 2030 (ICDTV). **Best Research Paper Award**.
- **Priyam Sekra** and Vipul Bhatia. *AI-Powered Employee Cyber Awareness System*. Technische Sicherheit (Scopus-indexed).
- **Priyam Sekra** and Vipul Bhatia. *VIZAR0: A Unified AI-AR Framework for Immersive and Personalized E-Commerce Experiences*. International Conference on Sustainability, Innovation & Technology (ICSIT). Under review.

PROJECTS AND GRANTS

- **Vani: WhatsApp AI Memory Assistant** (2026 – Present) — building a WhatsApp-based second brain that turns everyday messages, photos and voice notes into structured contacts, tasks, reminders and notes, with semantic search over long-term memory (e.g. “Who did I meet at that AI event?”) and daily planning summaries.
- **Realtime Speech-to-Speech Evaluation** (2026) — deployed Sakana AI’s KAME and Liquid AI’s LFM2.5-Audio on RunPod and compared Nova 2 Sonic with Gemini Flash Live on cost and time-to-first-token.
- **Innovative Fast Retrieval-Augmented Generation System** (05/2025 – 08/2025) — hybrid sparse + dense retrieval (BM25 + FAISS) with Reciprocal Rank Fusion for fast, scalable retrieval from large documents across business use cases.
- **Driver Behaviour Detection and Analysis** (05/2024 – 02/2025) — continued the AIProStack driver-monitoring work as a research project with Dr. Sandeep Pandey (University of Stuttgart).
- **ICreate Grant** (04/2024) — awarded funding by ICreate, an Indian government-supported technology incubator, for an AI-based driver assistance and behaviour detection system.

AWARDS AND ACHIEVEMENTS

- | | |
|---|---------|
| • 4th place, Bajaj Finserv HackRx RAG hackathon, among 20,000+ teams | 2025 |
| • NMIMS University Award for designing the best B.Tech final-year project (Capstone) | 2025 |
| • Hosted a two-day Chatbot Bootcamp and two Augmented Reality workshops | 2024–25 |
| • Best Research Paper Award for “SafeCam” at ICDTV 2030 | 2024 |
| • Semi-finalist, Eureka! 2024 , IIT Bombay’s business model competition | 2024 |

COLLABORATORS

- **Dr. Sandeep Pandey**, University of Stuttgart, Germany — *Driver Behaviour Detection and Analysis*
- **Sylvester Obafunwa**, Industry Advisor, Tata Consultancy Services, USA — *Father–Son Relationship App*
- **Dr. Shailaja Rego**, School of Business Management (SBM), NMIMS Mumbai — *Review of Smart Technologies Applications in Logistics and Transport*
- **Dr. Mahendra Parihar**, NMIMS MPSTME, Mumbai — *Review of Smart Technologies Applications in Logistics and Transport*
- **Dr. Sweta Soni**, NMIMS MPSTME, Shirpur — *Empathetic Intelligence: LLM-based Conversational AI Agent*
- **Jitin Doriya**, CTO (Indian Institute of Technology (BHU) Varanasi) — *Low Latency Conversational AI Voice Bot for Large Documents and Restaurant Menu*
